

SKINDUSTRY™ TREATMENT CARE

GENUINE DERMAROLLER™

Following your treatment, Skindustry™ recommend that you follow all aftercare to ensure the best results possible.

Immediately after your DermaRoller™ treatment you will look as though you have moderate sunburn and your skin may feel warm and tighter than usual. This will start to subside after 1 to 2 hours and will normally recover within the same day with only slight redness the following day.

Pre Treatment Care

- Protect your skin with a physical barrier SPF (Recommended by your practitioner).
- Do not expose skin to UV light (including the use on sun beds and fake tan) for at least four weeks prior to treatments.
- Drink water daily, preferably up 2 litres to maintain hydration.
- Follow your homecare routine, in order to prepare the skin. This will be prescribed to you by your practitioner.

Aftercare

- Protect your skin with a physical barrier SPF (Recommended by your practitioner).
- Drink water daily, preferably up 2 litres.
- Use a soothing cleanser / face wash with tepid water to cleanse the face for the following 48 hours and dry gently. Always make sure your hands are clean when touching the treated area.
- Following your DermaRoller™ treatment as the skin may well feel drier than normal. Hyaluronic Acid is an ideal ingredient to hydrate and restore the skin back to a perfect balance.
- In the days following your DermaRoller™ treatment, as the skin starts to regenerate, collagen stimulating peptides are ideal to keep the stimulation going. This will be advised by your practitioner.
- Follow your homecare routine which will be prescribed to you by your practitioner. This will help to soothe, calm and protect the skin. Continue use for 3 days. Active skincare can be resumed again after day 3.
- To ensure the right healing environment, for at least 2 days post treatment, do NOT use any Alpha Hydroxy Acids, Beta Hydroxy Acid, Retinol (Vitamin A), Vitamin C (in a low pH formula) or anything perceived as 'active' skincare.

- Avoid perfumes, aftershaves, perfumed products, oils and moisturiser on the area for 24-48 hours after treatment. (Unless advised by your practitioner).
- Avoid exercise for 24 to 48 hours after treatment.
- Avoid swimming and heat treatments (e.g. saunas, hot baths) for 48 hours after treatments.
- Avoid touching or picking the area as it may increase risk of inflammation and infection of the skin.
- Only use mineral make up directly after the treatment. Otherwise, wait 24 hours before using any other make up products.
- Do not expose skin to UV light (including the use of sun beds and fake tan) for at least two weeks after treatments.
- For long term results book in for regular treatments advised by your practitioner.

If you feel that you may be experiencing any side effects, are unsure about anything, or if you are uncertain with the results, please do not hesitate to contact Skindustry™ so we can resolve any issues. Skindustry™ may arrange a follow up skin assessment where any adjustments can be made.
